EXPERIENCE

Eulerity, New York City, NY
Android Mobile Intern   June 2023 – Present
- **Unite with team members** to grasp challenges, tackle them head-on, and deliver impactful solutions from inception to implementation.

Stevens Insititute of Technology, Hoboken, NJ
Course Assistant   Feb 2023 – May 2023
- **As a Course Assistant for the graduate-level course Mobile Systems and Applications** at Stevens, I play an integral role in ensuring the smooth operation of the class.
- **I closely collaborated with the professor,** arranging the course and guiding 50+ students to enhance their grasp of course material and Java-based Android App Development.

Creative Infoway, Ahmedabad, India   June 2019 – March 2021
Mobile App developer
- **Continually improved efficiency of projects and tasks**. Work eagerly to ensure that the process of developing android apps is streamlined and all the potential errors and risks anticipated earlier.
- **Cooperated with all the engineers of app development.** Worked with production team of Display Social where implemented new features and solved bugs identified by the tester.
- **Maintained programming standards to finish projects.** Wrote neat and clean, self-documenting, easy to read code, so other peers can continue work on projects without any extra effort to understand code.

PROJECTS

Frugal Friend   Jan 2022 – May 2022
- Simplify expense tracking, set saving goals, and estimate income with our interactive web app, designed to help you effortlessly manage your finances.
- Harnessing the power of Node.js and React, our cutting-edge web app seamlessly integrates with MongoDB to store data. Leveraging Redis, Docker, Firebase authentication, and ImageMagick, we deliver a truly remarkable user experience.

LocalBuds - Service Finding   Sept 2022 – Dec 2022
- This web app offers various Handyman services to users or if one wants to do freelancing of handyman service, they can post their services to LocalBuds.
- Utilized JavaScript, AJAX, jQuery, and launched node express server and stored data into MongoDB database with dynamic webpage using Express Handlebars.
- Used agile software method life cycle to complete the project.

Pig Master   June 2020 – Dec 2021
- This is an Android app written in Kotlin language and built upon the latest Android APIs and libraries.
- Data is stored in remote servers and fetched using asynchronous REST API calls with coroutines and represented using livedata.
- The first version of the app was launched to google play store in January 2021 and gained almost 2000+ users in 3 months.

CERTIFICATIONS

Google Play Academy - Store Listing Certificate   May 2023 – May 2025
- **Excelled in adhering to best practices for creating a captivating Google Play store listing,** that tells the unique story of app or game, while effectively targeting a global audience.
