PROFESSIONAL SUMMARY

Android Developer with 5+ years of experience across enterprise and client-facing platforms, specializing in Kotlin, Jetpack Compose, and modern Android architectures (MVVM, Kotlin Flow). Proven track record of modernizing legacy codebases, optimizing app performance, and leading mobile initiatives to deliver seamless user experiences at scale.

TECHNICAL SKILL

Languages: Kotlin, Java, Swift, Javascript, SQL, XML, JSON

Android Development: Jetpack Compose, Android SDK, MVVM, Kotlin Coroutines & Flow, Dependency Injection (Hilt/Dagger, Koin), LiveData, Gradle, AGP, Kotlin Multiplatform (KMP), Ktor

Tools & Platforms: Android Studio, Xcode, Git, Jira, Postman, Figma, Google Play Console

Database & Cloud: SQLite, Room, MySQL, MongoDB, AWS, GCP

WORK EXPERIENCE

Eulerity | New York City, NY

Android Developer | Jan 2024 - Present

- **Led Android team during leadership absence and continued as primary Android owner**, driving releases, code quality, performance optimization, and team support.
- **Built Listings Management feature for 1500+ platform users**, enabling single-source business information updates that seamlessly propagated across Google Maps, Apple Maps, Facebook Page and Bing Maps.
- **Overhauled the Ad/Post Builder flow** by transitioning to Jetpack Compose, reducing user steps from 10 to 4, which significantly improved the onboarding experience.
- **Developed scalable features using ViewModel, Kotlin Flow and Jetpack lifecycle components** within a unidirectional, state-driven UI pattern.
- **Maintained application health** by proactively updating dependencies, AGP, and Gradle configurations, effectively reducing technical debt and mitigating deployment risks.

Android Mobile Intern | June 2023 - Dec 2023

- **Refactored legacy user onboarding flows** by transitioning codebases from Java to Kotlin, improving overall maintainability and modernizing the app's foundation.
- **Collaborated with cross-functional teams** to resolve technical challenges and deliver high-quality mobile solutions from inception to implementation.
- **Maintained strict programming standards** by writing clean, self-documenting code, facilitating seamless handoffs and continuous development across the mobile team.

Stevens Institute of Technology, Hoboken, NJ

Course Assistant (Mobile Systems & Applications) | Feb 2023 - May 2023

- **Guided 50+ graduate students** in mastering complex course material centered around Java-based Android App Development.
- **Collaborated with the primary professor** to structure course materials, troubleshoot student code, and ensure the smooth execution of the academic curriculum.

Creative Infoway, Ahmedabad, India

Android App Developer | June 2019 - Mar 2021

- **Developed and maintained Android applications in Kotlin for client projects**, collaborating with engineering teams to implement features and resolve bugs.

PROJECTS

Expense Tracker (Mobile App) | *Kotlin Multiplatform, SwiftUI, Ktor, Koin* | Jan 2026 - Present

- Built a cross-platform expense tracker using Kotlin Multiplatform (KMP) to share business logic for categories, budgets, and recurring expenses, with native UI in Jetpack Compose (Android) and SwiftUI (iOS).
- Added spending insights and charts on top of the shared KMP logic, using Ktor for API calls and Koin for dependency injection to keep the codebase modular and testable.

Pig Master (Android App) | *Kotlin, Coroutines, LiveData, REST APIs* | June 2020 - Dec 2021

- Engineered and launched a native Android Application to the Google Play Store, successfully acquiring 2,000+ active users within the first 3 months of release.
- Designed the data layer to fetch and store data from remote servers using asynchronous REST API calls with Coroutines, managing state seamlessly via LiveData.

EDUCATION

Stevens Institute of Technology, Hoboken, NJ

Jan 2022 – Jan 2024

Master of Science, Computer Science

Shree Manibhai and Smt. Navalben Virani Science College, Rajkot, India

June 2016 – April 2019

Bachelor of Computer Applications
